We make it *POSSible!!!*

## EPOINT Inventory Control

### Manage Your Inventory Effectively

#### Inventory control

the supervision and management of stock, is essential for every business. But the process can be troublesome and time-consuming. With EPOINT POS System, inventory control is made easier and more accurate. Not only does the system keep track of various types of inventory, it also provides detailed analysis of stock consumption that helps businesses identify their sales and market.

- Stock-Taking
- FOUR Types of Inventory
- Stock Placement
- Stock Reorder Level Alert
- Cost Adjustment
- Consumption Analysis
