

Prevention and protection solutions to help keep your business safe and secure.

## CCTV

- Select from a number of methods for remote viewing, from IP-based cameras to web-based browser software.
- Video is a strong deterrent to theft and fraud, but digital recording allows you to document events

## ALARM SYSTEM

- Networked alert system operates 24/7 for round-the-clock protection
- Real-time monitoring ensures that critical assets, customers and/or employees are fully protected.

## ACCESS CONTROL

- Access control cards and readers
- Photo I.D. badge deters fraudulent or misuse of access
- Biometrics of different locations networked together through telecommunication technology

## EAS INTELLIGENCE

- Automatic alerts sent to store personnel as soon as equipment concerns occur
- Alarm data helps management identify and track shrink and failure-to-deactivate (FTD) challenges
